

CHAINALYSIS REACTOR INTRODUCTION

CRI provides an introduction to the Chainalysis Reactor software. Attendees will be equipped with a foundation level understanding of the main features of 'Reactor' and will enable them to begin conducting their own blockchain analysis and Virtual currency investigations.

Attendees will be given temporary access to Chainalysis Reactor and will navigate the software themselves with practical exercises and demonstrations.

Attendees will:

- ✓ Understand the concepts of clustering and identification that underpins the Reactor software.
- ✓ Navigate Reactor's main features
- ✓ Conduct analysis of different clusters and create user friendly graphs to aid understanding.
- ✓ Understand the concept of value transfer and Unspent Transaction Outputs (UTXOs)
